# From Manuscript to Income

A Simple Publishing Checklist

PHOENIX CREATIVE LABS, FROM IDEA TO INCOME

Publishing your first ebook isn't complicated, it just needs the right order. This checklist walks you through everything from a finished manuscript to a published, sellable book on Selar and Amazon. No tech background needed.

## 1. Before You Upload

- [ ] Pick one clear topic and one specific reader
- [ ] Finish your manuscript in Google Docs or Word
- [ ] Insert your front cover as page 1, with a page break after it
- [ ] Export the full manuscript (cover and text) as one PDF
- [ ] Design a simple, professional cover with your title, subtitle, and author name (Canva works well for beginners)
- [ ] Save the cover separately as a JPG or PNG
- [ ] Create your Selar account (and Amazon KDP account, if using both)

## 2. Uploading on Selar

- [ ] Log into your Selar dashboard
- [ ] Click Create Product, then Digital Product
- [ ] Add your title and a clear product description
- [ ] Upload your PDF manuscript and cover image
- [ ] Set your price in Naira or Dollars
- [ ] Enable payment options and click Publish

*Reminder: Selar has no built-in discovery, so you sell by sharing your product link directly.*

## 3. Uploading on Amazon KDP

- [ ] Log into Amazon KDP, then Create, then Kindle eBook

- [ ] Add title, subtitle, and author name
- [ ] Write your book description and choose 7 keywords plus 2 categories
- [ ] Upload your manuscript and cover (recommended cover size: 1600 x 2560px)
- [ ] Preview using the KDP Previewer before publishing
- [ ] Set your price and choose your royalty option
- [ ] Click Publish

## 4. Final Check Before You Go Live

- [ ] Title is readable on a phone screen
- [ ] Cover looks clean and professional
- [ ] File opens correctly on mobile and desktop
- [ ] Price makes sense for your audience

## 5. Mistakes to Avoid

- [ ] Publishing and then going silent, with no promotion and no follow-up
- [ ] Using irrelevant or stuffed keywords
- [ ] Picking the wrong category
- [ ] Sloppy formatting, especially on mobile
- [ ] A cover that looks rushed or outdated

---

**You don't need to be everywhere at once. Get it live on one platform first, then expand. That's how one idea becomes a real, repeatable income stream.**
